

(a) pooled over 2,910 runs: 12 values of a , 6 budgets, both optimisers
(Clopper–Pearson 95% intervals)

(b) same curve for both optimisers ($a = 1.25$, $n = 180$ each)
Fisher exact, two-sided

(c) R dominates its factors — except family B ($\beta = 1$)
1,500-resample bootstrap 95% CI
