(a) every candidate of the frozen search, $a = 1.30$: $n = 2,701$ candidates at 59 evaluations; frozen result reproduced 59/59; none below the retained branch; certified widths $\leq 1e-09$

(b) the branch crosses $G = 0$ continuously: G changes sign once; minimisers either side of the switch $\leq 2.7e-04$ apart (certified); other basins $\geq +0.0031$ above (certified, radius 0.1)
